WILL THEY EVER!

When Will People Learn to Keep off Railway Tracks?

An awful accident occurred on the C and O. Railread Saturday, in which Mrs. Hestera Sellers, aged 36, residing be-tween Oneonta and New Richmond Station, lost her life. About 12:30 p. m. she, with a six year-old child, was cr ing the twelve-mile bridge, when the Eastbound F. F. V. came thundering along. Mrs. Sellers pushed the child along. Mrs. Sellers pushed the child on to one of the abutments and at-tempted to get out of the way of the train. The engine struck her, however, tearing the top of her skull off and break-ing a number of bones in her body, death being instantaneous. The child was saved by her thoughtfulness.

Advance Agent of Pros erit

State Auditor of Colorado threatens to refuse to grant a license for Colerado business to insurance com panies that send out circulars warning policy holders against the effects of free silver on their policies. By all means let the Colorado A- (beg pardon, Auditor.) proceed with his threat. The country will soon learn the full extent of the bulldozing methods of the insolent millionaires who own silver mines, and who are now trying to unload their product at nearly double its real value.

IT requires a good deal of repetition satisfy the demands for information as to the meaning of the terms "16 to 1," but THE LEDGER has entered upon this "campaign of education" determined if possible to make matters so plain that "he who runs may read."

Under the existing law the gold dollar is the "unit of value." but the silver dollar is equally a legal tender for all debts. The gold unit contains 23.22 grains of pure gold, worth in the markets of the world 100 cents: worth just the same before made into coin as afterward. Coinage adds nothing to its value and gold is not favored. The Secretary of the Treasury is required by existing law "to preserve the parity between the two metals." In conse quence of this policy every dollar of arrency in this country is the equivalent of the gold dollar.

The silver dollar contains 371; grains of pure silver-sixteen times-exactly 15.98-the amount of pure gold in a dollar. Hence by "16 to 1" is meant that sixteen cances of silver made into our legal tender coins shall be the lawful equivalent of one ounce of gold. market price of silver is 69 cents an ounce-480 grains-hence the actual value of 371 14 grains of silver in our In other words, one ounce of gold will buy nearly 32 ounces of silver.

The demand of the Chicago platform may be defined as the right of anyone to deposit silver of any kind at a Mint the United States and have every 3711 grains of pure silver-now worth in its uncoined state about 53 centsde, free of charge, into a coin of the United States and stamped "one dollar," which dollar shall be a full legal tender at its face value in the payment of debts and obligations. No provision is made for maintaining these dollars at par with gold.

The immediate result of such legis ation would be the destruction of the parity, the separation of our currency en gold and silver and the with drawal of all gold coins from circula tion and use as money, producing 'an

relinquishes Editorial and business con trol, and the paper passes back to the hands of Colonel JOHN W. ZOLLER owner of the plant and from whom Mr. DEMING had leased it. In the retire ment of Mr. DEMING the Kentucky pres loses a worthy member, and THE LEDGER wishes him success in any field he may choose for the future. It also welcom the return of Colonel ZOLLER to the fold, and will surely enjoy his happy thrusts at our friends the enemy.

THE crusade for free silver is repr ented by its orators to be a movement particularly in the interest of poor men

that it must, therefore, be a bad thing

They never tire of the rich are all for the gold standard says The St. Louis Globe-Democrat,and

for people of small means or no means at all. But is it true that the wealth; are unanimously against free silver It requires but little investigation to ascertain that such is not the case ome of the most conspicuous of the free silver leaders are millionaires Senators Teller, Jones and Stewart are all rich men. The same is true of NEWLANDS, who presided over the Silver Convention, and of LANE, who contrib uted \$3,500 to pay the expenses of tha body. The most active and influential members of the Chicago Convention were not poor men, but men of comfort able fortunes, most of them having large interests in silver mines. Thes men are not in any trouble about th payment of their debts or the earning of a living. They are the holders, not the givers, of mortgages; and all their talk about solicitude for the welfare of the farmers and laborers is sham and mockery.

As a matter of fact, the only me

who are likely to profit by the triumph of free coinage are those who own silver mines. These men have furnished the money to carry on the agitation for silver. They have supported the various organizations by which lecturer have been sent out, and lobbyists kep in Washington, and literature scattere over the country to boom the white etal. It is idle to suppose that they have done all this in the spirit of philanthrophists, and for the purpose of preventing the crucifixion of mankin on a cross of gold. They have been actuated by motives of a strictly selfish order; they are today seeking advantages for themselves, without the leas desire to help anybody else. Thei money is behind the silver crusade sin ply because they are thus trying to make a market for the product of their mine at an exorbitant price. The thing is speculation with them, and if it wins they will gain millions by it, at the expense of all the rest of their fellow citizens. They have bullion to sell, and their principal object in life is to foist it upon the country at twice its real value and substitute it for the sound as any who believe in free coinage of and satisfactory money now in use Nobody can expect to be benefited by all the silver of the world and bring it free coinage in these place course who free coinage but these mine owners who

Bublic Ledger Tribune Democrat Mr. T. H. DEMING A PENSIONER TRIES CHEAP MONEY.

Mr. Baker, American Minister to Central America, recently sent a communication to the State Department at Wash ington, says The Philadelphia Times, that furnishes a very pointed object lesson for the nearly one million pensioners of the country as to the enormous loss they must suffer if the free silver cheap money candidates of the country shall be success ful in November. The case presented by Mr. Baker would be the exact experience of every one of our nearly a million pensioners if the free silver standard were adopted in this

Some five years ago an invalid soldier drew a back pen sion of \$4,000 in United States gold or its equivalent, and went to one of the Central American states, hoping to recover proclaiming that his shattered health by the gentler climate of that region Gold then commanded a premium in the country in which he located, and soon after his arrival he deposited with a relia ble banking company \$3,800 of his gold to give him a certificate of deposit of \$4,000 on the silver basis of the country, to bear 8 per cent, interest.

> For four years he continued to draw his interest, notwithtanding the continued rise in the premium of gold, but finally gold rose to the point of double that of silver, making his de posit worth but a trifle more than half its face value, when he received notice that the bank had ceased to pay interest to its depositors

> The American pensioner then consulted Minister Baker to what course he should pursue to enable him to live on his pension that had become reduced nearly one-half. For the purpose of safety he permitted it to remain another year on deposit, when he finally decided to draw his money out and to get it transferred into reliable money. His \$4,000 of deposits then enabled him to purchase \$1,731 in gold.

> Thus the American invalid soldier who made the experinent of living in a cheap money country found the silver curency of the country so capricious that at the end of five years he could obtain only \$1,731 in honest American money for his \$4,000 of deposits, thereby suffering a loss of quite one-half of his entire pension money.

> This American invalid soldier pensioner has simply made the experiment in Central America that every one of our nearly a million pensioners in this country would be compelled to make if the cheap money theory shall prevail at the November election. In short, the adoption of free silver in the United States would be simply the annual robbery of \$70,000, ooo from the pensioners of the country

WHO IT WILL HURT.

FREE SILVER WILL BENEFIT

Chief Justice R. R. Bigelow of the Supreme Court of Nevada had a letter in a recent issue of The Reno (Nev.) Gazette which states some of the effects

of 16 to 1 free coinage every clearly. Here is a part of his letter: It is net to be denied that the Repubcans of this state are hard hit by the ction of the St. Louis Convention upon the monetary question. The free coin-age of silver is believed to be so much to the advantage of Nevada as a silver producer, and we have for so many years heard nothing but free coinage "at 16 to 1" arguments, that we have almost come to the conclusion that no one can think to the conclusion that no one can think who are now getting pensions. Its efotherwise who is not a scoundrel bought feet will be to scale their pensions down with British gold. But there is another one-half. side to the question that is believed in sincerely by millions of as pure patriots free coinage but these mine owners who are contributing so freely to the silver lessons of the past or he willfully abuts teampaign fund; and surely the intelligence of the American people will not permit such a scheme to succeed.

A business man is not the most patient creas—if will utterly destroy it. There is the surely lang-drawn-outstory of his alment. He doesn't the land that will hot go down between the past of the storm. It will not only paralyze business house ture in the world. He cannot wait to hear any lang-drawn-outstory of his alment. He doesn't the land that will hot go down between the past of the promition of the storm. It will send gold to almost predisposed to servofule, or consumption.

That, "he will rely our "has nothing to do with the case." He wants to be well. If he can be value with it, but as it will take twice as oursel, with one of the past of the provest it to be the best medicine in the value with it, but as it will take twice as oursel, with one world. He not trying coolines, which world for bowled complaints, which world for bowled complaints, world the storm. It will be of no earthly advantage to be the storm of the provest it to be the best medicine in the value with it, but as it will take twice as ourselved the past to be well. If he can be valued to the provest it to be the best medicine in the value with it, but as it will take twice as ourselved the past to be well. The past to be will be for bowled complaints, world the past to be world. The results were done the past to be world. The results were done the past to be the best medicine in the value with it, but as it will take twice as ourselved the past to be the best medicine in the value with it, but as it will be of no earthly advantage to the past two by the same of the and gold to par is either ignerant of the

have all protected themselves by gold contracts, he will have to take two of his silver dollars to buy one in gold, and a the same time, owing to the general stag nation in business, they will be harder t get hold of than gold dollars are now. will be of no advantage to the silver states, because their silver will be just as hard to get from the ground as now, and a pound of it will buy no more steel o powder or any of the necessaries of life

But the laboring man will be the on who will suffer the most. The Comstoci miner will still get \$4 per day, the labore \$3 and the clerk \$60 to \$75 per month but it will be in silver, and, as it is now in Mexico, it will only buy for his family or himself one half what it will today The same will be the case with the crip pled veterans, their widows and orphans

There is not one of the arguments o the silverites that cannot be completely and successfully refuted. Free coinage at 16 to 1 by this country alone canno possibly benefit any one, but it can bring fearful distress upon all.

Litele is will be of no earthly advantage to any one except to the man who owes debts that he has not promised to pay in gold. His silver dollars will pay such a debt just as during the war greenbacks of the properties as now.

But if he owes money to banks or money lenders—and who does not—who letters and properties of the shower rates. Send 2 courts for illustrated pamphiles. Address, A. A. money lenders—and who does not—who letters of properties.

All persons having claims again e estate of Henry Smith, decease the cetate of Henry Smith, deceased, will present them at once, properly sworn to and proven; and all persons knowing themselves to be indehted to said estate will please call and settle. WM. WORMALD, A. M. J. COCHRAN, August 34, 1895. [augs 2w] Executors.

FOUND THE WRONG MAN.

Mistake of a Page Which Brought Up Three Bills.

A funny thing happened, involving three of the Illinois members during a recent session of unanimous consent in the House. The difficulty in securing recognition for the attempted passage of any bill cannot be exaggerated, and Mr. Burrell of Illinois had realized this fact to the full measure of sorrow while try-ing to secure action on a little private bill which he had in tow for one of his constituents. He had been to see the Speaker a number of times, beseeching him to let the bill come up, and finally Mr. Reed yielded, and told him to be on time the next morning with his bill in his hand standing somewhere so that he could catch the Speaker's eye.

Mr. Burrell did not neglect the advice

to be conspicuously on hand, so he stood in his seat, and at the first available op-portunity waved the bill in the air. The Speaker had not forgotten his promise, and when a suitable opening came, said: "The gentleman from Illinois is recog

o get the bill and bring it to the clerk's desk, but seeing Mr. Connolly standing in his place, holding a bill in his hand and as he came from the state designated the page rushed up to him, took the bill and hurried it to the desk. The Speaker did not in the least relish this error, as Mr. Connolly would probably be one of the last men he would favor with a rec gnition, but making the best of a bad

bargain, the measure was allowed to pass.

Mr. Reed then looked over in the direction of Mr. Burrell and again said: 'The gentleman from Illinois.'

Another page started to follow the di-rection of the Speaker's eye but ran into Mr. Graff also of Illinois who had been haunting the first seat in the middle aisle for more than a month waiting to bring a bill up, and this was taken to the desk and read. The Speaker looked considerably annoyed, but persisted in the origi al intention of seeing that Mr. Burrel and for the third time said:

"The gentleman from Illinois.

This time the page found his way to the proper person, and Mr. Burrell's bill was passed. But several members smiled was passed. Dutsevera members smiled to themselves as they reflected en the fact that two unexpected bills had received attention on the strength of the recognition promised Mr. Burrell.

The steamer Virginia wired from Catterburg this morning that she would pass down this afternoon at 4:39.
